CleanThru™ Anti Plugging Screens

will work for you!

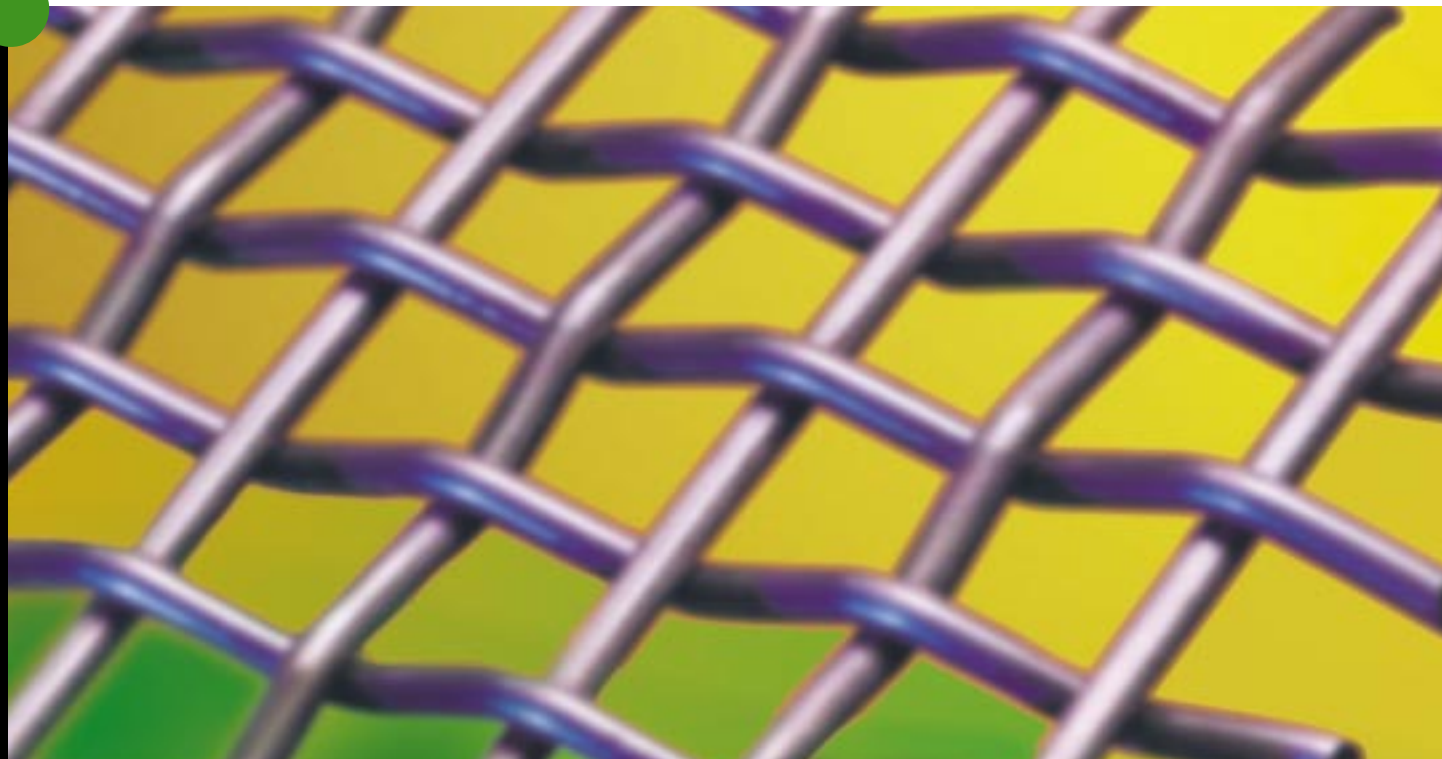

"Self-Cleaning" Crimp Style

Clean Thru™ is a combination of straight and a crimped wires in a square opening design. The tensioning of the straight wire allows the crimped wire to vibrate in such a way that pegging becomes a problem of the past, in processes such as asphalt, wash plants, coal mining and mason sand.

The Clean Advantage

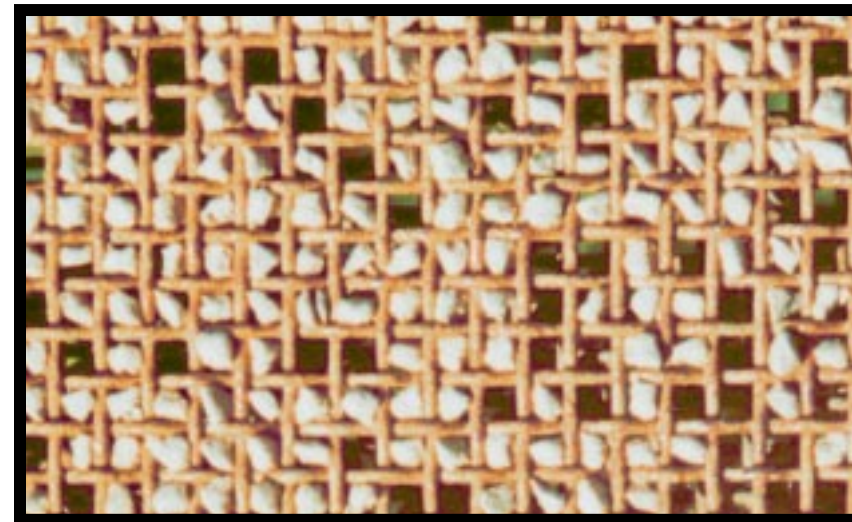

Clean Thru™ accomplishes exactly what it says. As products are sorted and sized through this revolutionary media, plugging is minimized.

- The square weave design has more open area than traditional square weaves
- Provides a consistent cut to keep your mix design in spec
- Helps you to meet and exceed DOT Superpave specifications

Blinding Headaches from Beginning to End

Have pegging headaches been causing problems in your throughput?) Pull the plug on your problems. If the image below looks all too familiar, ask yourself...

- Are blind screens giving you an inconsistent mix design?
- Do you have to add asphalt to compensate?
- Are you forced to wait for your bins to fill?
- Is your QC Engineer constantly saying that you're out of spec?

If you answered yes to any of these questions, then Clean Thru™ is the solution for you. The headaches are gone, reducing lost production time and increasing your bottom line.

The Answer You've Been Looking For

Try Clean Thru™ in your own operation today. End the hassles of screen plugging and blinding. See for yourself how it can give you more consistent screening quality and reduce your maintenance and downtime.

Backed by extensive product knowledge, our customer service staff makes it easy for you to call us about your order or application questions. They listen to your needs and have the systems to make ordering efficient and accurate. Contact us today at 800-828-7028 with your blinding problems.

A word FROM OUR customers

“ Blinding was slowing down production and throwing my asphalt out of spec. Until I got Clean Thru™. It worked beautifully! Better than any screen I've used in 15 years of processing asphalt. ”

Roger Lanley, Plant Manager
Brox Industries,
Milford, NH Division

“ In high moisture applications, Clean Thru™ has proven itself to be an industry leader providing high productivity with excellent wear life. ”
