Wear Protection AR Plates 200F, 400F & 500F

Protect your investment and increase the lifespan of your equipment. Buffalo Wire plates reduce down time and cost per ton produced.

Our plate withstands heavy, abrasive, sharp pointing loads and high impact solutions.

Applications

AR plates can be used to cover any high wear areas, such as chutes, loading areas, material transfer zones, excavator buckets, material handling, soil handling and overall general protection.

Installation

AR plates can be welded on or screwed in. Plates come in a wide range of sizes and shapes and can be customized in the field.

AR400F and AR500F are designed to be used in areas with abrasion and minimal impact.

AR200 is designed for impact and general abrasion.

Specifications

AR200F, AR400F and AR500F

Available in 1/4" to 4" thicknesses

Stock of 4'x8' ready to cut to your needs
