Gator Wire

Next Generation in Wire Cloth Screen Technology

Gator Wire is a premium wire, offering the highest available tensile strengths for maximum screen life while maintaining superior ductility for impact and wear resistance.

Available in a vast array of apertures and wire diameters.

Screen Attributes

- Cutting edge micro-grain structure
- Strong enough to withstand trauma or product impact, vibration fatigue and stress of vibratory units
- Longer screen life reduces screen changes, saves downtime and reduces cost per ton
- Uniform hardness and wire diameter for increased wear life
- Offered in space, mesh, slotted openings and anti-blinding designs

Advantages

- Saves downtime and costs
- Wears thin and smooth for predictable screen replacement and a healthier bottom line
- Spend less time changing screens and more time generating product
- Increases profitability
