

# Clean Weave

- Self cleaning screen
- Anti-blinding and pegging
- Increases screening efficiency
- Ideal for many spec applications including hot asphalt screening
- Available in a variety of openings to meet your needs
- Experience increased screen life over standard wire cloth
- Its superior quality and longer life reduces the amount of change outs; saving you time and money

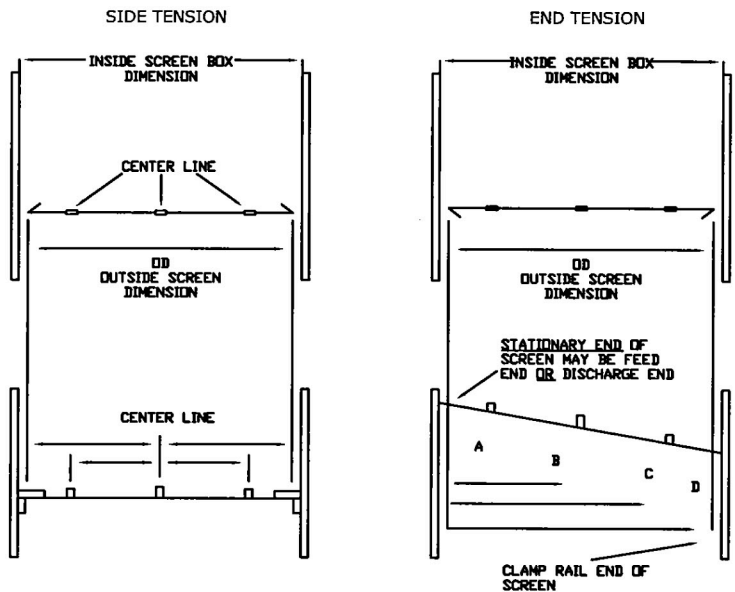

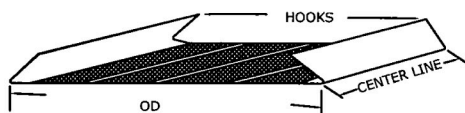

CLEAN WEAVE

Buffalo Wire's Clean PFX and Clean Weave Screens are most efficient in the screening and sizing of sand, gravel, coal, topsoil, crushed stone, blasted rock, and compost.

The PFX and Clean Weave series needs to be fitted to each screen machine for crown bar locations.

### Measuring Requirements:

- Measure the inside dimension of screen box
- Measure and mark center line
- Measure and mark crown support bars from center line

Providing over 141 years of Engineering, Innovation and Customer Service
